

What is Equilube

Equilube is a product offered by Tribolube Lubricants, greases and oils which are commonly used throughout the automotive and industrial sectors. The concept is designed to support resellers of lubricants with an easy solution to supplying a market demand.

Tribolube does not manufacture or promote products of its own, nor does it supply directly to the public, making it the toll blending partner of choice.

The products are manufactured to similar or equivalent specifications for those commonly found in the market place. They meet all the required international performance standards, in ISO approved facilities using virgin base oils and world renowned additive packages.

As a reseller, you get:

- ⬢ Access to off-the-shelf stock which is currently kept in Johannesburg and Durban.
- ⬢ A branded product which can be sold as is, or easily re-dressed to suit your own brand, supported with editable soft copies of the technical and material datasheets
- ⬢ Access to technical support
- ⬢ A service which enables little to no stock holding
- ⬢ Peace of mind for both quality and product performance
- ⬢ A certificate of analysis
- ⬢ A comparative chart for most commonly used lubricants in the market

Always in stock:

We ensure that stock is held for the following products, which have been selected to provide the reseller with access to the most commonly used products in the market today. The current stock items are as follows, however can be added to should an opportunity arise.

- ⬢ Greases
 - Multi-purpose lithium EP2
 - Multi-purpose lithium calcium EP2
 - Lithium complex EP2,3 (e.g. wheel bearing grease)
 - Lithium Moly EP2 (e.g. CV joint)
- ⬢ Motor Oils
 - Multi-grade 15W40 CI4/SL
- ⬢ Automotive Gear and Transmission Oil (80W90GL5, AFT DII)
- ⬢ Antifreeze (50%)
- ⬢ Hydraulic Oil (ISO68)

Packaging:

- ⬢ All stock holding products are in 18kg / 20L white plastic pails.
- ⬢ Grease can be ordered in 18, 50 & 180kg packs
- ⬢ Oils can be ordered in 20 & 210L packs.
- ⬢ All products have an EQUILUBE colour sticker as well as a separate label detailing the product description, batch number and codes.
